Address:

Flanders, Belgium

Languages:

Dutch - native

English - C2

Technical skills:

Game Engines:

Unity, Unreal

Programming:

C++, C#

Version Control:

Git, Perforce (P4V)

Soft skills:

- Clear communicator
- Supportive teammate
- Curious problem-solver
- Quick learner
- Analytical
- Flexible

Wout Claes

Summary:

I am a game developer with a deep enthusiasm for solving the technical challenges behind modern game creation. Studying at a leading game development school, I focus on building systems and pipelines that empower designers, artists, and programmers to do their best work. I'm often described by friends and family as "annoyingly passionate", which I take as a compliment. I enjoy solving problems and improving systems, and I also bring experience applying game-development concepts outside traditional contexts. My work in gamification taught me how to adapt my skills across industries while staying true to my roots: creating systems that make people's lives easier and more enjoyable.

Experience:

Flexso Digital

Jul 2024 & Jul 2025

- Assisted in developing gamified digital solutions
- Research into SAP AI agents

Education:

Howest - Digital Arts and Entertainment

Bachelor in game development

Sep 2023 - Jul 2027

Musical academy Boom

Tenor saxophone

Sep 2014 – Jul 2023

PTS Boom

Technical science

Sep 2017 - Jul 2023
